

Do you have trouble reading your prescription labels?

Now there's a solution!

Download the FREE ScripTalk Mobile App

Ask your pharmacist today about Talking Prescription Labels and the FREE ScripTalk Mobile App! Call and we'll help get you set up with a participating pharmacy. Your pharmacy will place a small electronic tag on your prescription and you can use the App to access all the label info aloud.

iPhones:

- You will need to have an iPhone 7 or higher, with the most current software update.
- To read the ScripTalk label, hold the label close to the front top of the phone, near the ear piece/front-facing camera.

Androids:

- Your phone needs to have Near-Field Communication (NFC) capability.
- To read the ScripTalk label, hold the label close to the middle of the back of the phone – near the camera.
